Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,10 are rejected under 35 U.S.C. 102(b) as being anticipated by Rodden.

Rodden discloses a treadmill having a base frame, rollers, endless belt, deck 60,cushioning members 50, and limiting means (studs) 62.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2 -4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rodden.

Rodden's limiting means connection to the treadmill is reverse of applicant's claims 2-3. The examiner contends that it would have been obvious to one skilled in the art to reverse the orientation of said parts, e.g., to have the studs

screwed into the base frame and have the openings in the deck (with sleeves 82) for receiving the free ends of the studs.

As to claim 4, the examiner takes Judicial Notice that apertured screws are generally recognized in the connection art, and therefore the use of outer threads in the Rodden treadmill's sleeves would have been obvious to one skilled in the art to securely fastening the sleeves to the treadmill deck.

5. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rodden in view of Real et al .

Real et al discloses a treadmill deck region having casing 86 and securing means 76 for securing the casing to the deck for protecting the peripheral portion of the deck. Given this teaching, it would have been obvious to one skilled in the art to likewise provide the Rodden treadmill with safety casings for protecting the deck and for user safety purposes.

Allowable Subject Matter

6. Claims 5-7,9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
